EDUCATION

Rochester Institute of Technology

August 2011 - May 2016

Ph.D., Chester F. Carlson Center for Imaging Science

Thesis Topic: Aerial visual vehicle detection and tracking using an adaptive, multi-modal sensor.

Advisor: Matthew J. Hoffman, Ph.D.

Co-Advisors: Anthony Vodacek, Ph.D., John Kerekes, Ph.D.

University of Bridgeport

August 2009 - May 2011

M.S., Department of Electrical Engineering

Thesis Topic: Environmental non-speech sound classification with a new set of time-domain features.

Advisor: Buket D. Barkana, Ph.D.

Eskisehir Osmangazi University

September 2004 - May 2009

B.S., Department of Electrical and Electronics Engineering

Thesis Topic: Autonomous parallel parking of non-holonomic vehicles

Advisor: Osman Parlaktuna, Ph.D.

WORK EXPERIENCE

Senior Research Scientist

November 2020 -

Samsung Research America, Mountain View CA

Manager : Hongxia Jin, Ph.D.

Conducting research on vision transformers and multi-modal transformers for improved accuracy, and efficiency in terms of model size and inference speed.

Postdoctoral Fellow

July 2018 - October 2020

Department of Computer Science, Stanford University, Stanford CA

Advisor : Stefano Ermon, Ph.D.

Conducted research on building deep learning models with small data and run-time complexity. Additional research works include building machine learning models for sustainability using different modalities.

Computer Vision Engineer

June 2017 - July 2018

Planet Labs, San Francisco, CA

Worked on object detection in satellite images using convolutional object detectors and built a large-scale object detection dataset using satellite images, and conducted research to tackle small object detection in low resolution satellite images.

Computer Vision Engineer

August 2016 - June 2017

Autel Robotics, San Ramon, CA

Manager : Youngwoo Seo, Ph.D.

Worked on a long-term target following system deployed in the next generation drones. This work involves designing an online learning method to track a single object from a monocular camera at real-time on a low-end embedded platform. Other parts of my work include implementing and testing the tracking algorithm on the embedded system.

Computer Vision Algorithm Engineer Intern

November 2015 - May 2016

Futurewei Technologies (Huawei R&D), Bridgewater, NJ

Manager: Dong-Qing Zhang, Ph.D.

My internship work was two-folds. First, I designed a subspace learning method to detect strangers in

a family photo album using face-only and contextual features learned by Deep Convolutional Neural Networks. In the second step, I designed a probabilistic graph-based approach to assign semantic roles to individuals detected to be family members in the first step.

RESEARCH EXPERIENCE

Graduate Research Assistant

April 2012 - July 2016

Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology, NY

Advisor: Matthew J. Hoffman, Ph.D.

Conducted research on aerial vehicle detection and tracking inspired by an adaptive, multi-modal sensor. This work involves developing computer vision and machine learning methods to detect, associate and track ground vehicles in an aerial video. The unique challenges posed by medium-to-high altitude aerial tracking is addressed by efficient use of rich hyperspectral data.

Graduate Research Assistant

May 2014 - June 2014

Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology, NY

Advisor: Elizabeth Cherry, Ph.D.

Performed research on 3-D MRI cardiac segmentation to fully understand the underlying mechanics behind the ventricular fibrillation.

Graduate Research Assistant

August 2009 - May 2011

Electrical Engineering Department, University of Bridgeport, CT

Advisor: Buket D. Barkana, Ph.D.

Conducted research on classifying environmental sounds to classify abnormal and normal events. A new, pitch range-based features were proposed to improve the classification.

Graduate Research Assistant

January 2009 - May 2009

Electrical and Electronics Engineering Department, Eskisehir Osmangazi University

Advisor: Osman Parlaktuna, Ph.D.

Conducted research on autonomous parallel parking of non-holonomic vehicles.

TEACHING EXPERIENCE

Teaching Assistant

September 2019 - December 2019

Data for Development, Department of Computer Science, Stanford University

Instructor: David Lobell Ph.D., Marshall Burke Ph.D., Stefano Ermon Ph.D.

Graduate Teaching Assistant

January 2015 - May 2015

Pattern Recognition, Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology

Instructor: John Kerekes, Ph.D.

Graduate Teaching Assistant

August 2011 - May 2012

Programming for Imaging Science, Chester F. Carlson Center for Imaging Science, Rochester Institute of Technology

Instructor: Jeff Pelz, Ph.D.

Graduate Teaching Assistant

August 2010 - May 2011

Digital Image Processing, Audio Signal Processing, Speech Signal Processing

Electrical Engineering Department, University of Bridgeport

Instructor: Buket D. Barkana, Ph.D.
